## Let ACG Be Your Most Valuable Partner

When you choose ACG in Raleigh, NC as your construction site work contractor, you're getting more than a service. You're getting the commitment and dedication of a professional team with a proven track record gained over 20 years of service to customers in the Triangle. You're getting loyalty from a partner you can trust to have your best interests at heart—in everything we do.

At ACG Raleigh, we make use of a finely-tuned process that integrates several independent stages. First comes the Preconstruction Stage, which begins with a comprehensive assessment of the initial project plan. Next, we compile a basic budget and schedule as part of our due diligence.

During the Project Launch stage, our site work contractors conduct a final review of the scope, and implement the execution of the contract. By the time we are ready to embark on the Construction stage, each project has a highly qualified project manager at its helm, supported by experienced teams of workers who are supplied with the latest in modern technology and equipment.

For every venture we undertake, the goal of ACG Raleigh is to complete your project on time and with a high standard of excellence. It's a fact that many site work contractors stall at the close of a project, but we take great pride in finishing strong.

**Choose ACG to provide construction site work for your next project.**
